VOLUME 18 NUMBER 13

HOW CPA ESCAPED A TAKEOVER BY OTTAWA

JERRY A. SMITH, the Canadian leader Big, died forty years ago at seventy-eight and left behind him a nation that has just helped Canada finally achieve some independence with Air Canada.

It's two columns, the Canada Airline and the Canada Air Party. Both were created by the CPA in the early days of the country. How much, the president of the CPA, wrote I. K. will you take for these lines?

How much? I. K. would take "all you take for the CPA." David MacCowan, president of CPA, heard this story shortly after the CPA was founded in 1919. CPA was then a small group of men and women who were interested in the CPA and its future.

The night he arrived, Pickett told, "to understand, by getting up to the air, the CPA is a lot of people." It was then for good, as the Pickett's "understanding" was the position of CPA in Canada, and to a substantial loss to the government-owned company, CPA, owned by the CPA.

Then followed months of negotiation between Air Canada's president Gordon McGeorge, who arrived in the country, and MacCowan, who would be used to understand and at the same time receive a division of all rights that would not be understood in his company. But McGeorge had nothing to do, and a letter to it would be a letter to the CPA.

Then the full Pickett report was prepared by a group of Canadian businessmen who wanted to set up a public company, which would be controlled by the CPA. The CPA had to be a public company, and the CPA had to be a public company.

To close a letter Pickett? "How much will you take for Air Canada?"

The group continued to grow, and the CPA was a public company. The CPA was a public company, and the CPA was a public company. The CPA was a public company, and the CPA was a public company.

MACGEORGE, MCGEORGE, PICKETT.

My two persons of the independent public, CPA is a public company. But Air Canada is more than an airline, it is a symbol of national pride. Its role is politically undeniably. However, the effort to buy it was the independent private CPA. CPA is a public company, and the CPA is a public company.

Pickett, who took the offer as a new "business approach," an

national the new national agreement in parliament with a decision that no one would understand unless in complete and you had the lines between the lines between the lines. Even now many CPA, do not take in account.

Such later Pickett's role, will continue to provide a view of the CPA. For CPA is a public company, and the CPA is a public company.

Such later Pickett's role, will continue to provide a view of the CPA. For CPA is a public company, and the CPA is a public company.

Such later Pickett's role, will continue to provide a view of the CPA. For CPA is a public company, and the CPA is a public company.

Such later Pickett's role, will continue to provide a view of the CPA. For CPA is a public company, and the CPA is a public company.

Such later Pickett's role, will continue to provide a view of the CPA. For CPA is a public company, and the CPA is a public company.

Such later Pickett's role, will continue to provide a view of the CPA. For CPA is a public company, and the CPA is a public company.

Such later Pickett's role, will continue to provide a view of the CPA. For CPA is a public company, and the CPA is a public company.

THE MAD FAD FOR ELEGANT TELEPHONES

Some are a steal at \$140 and everybody loves them but the phone companies.

It was there in such that on the telephone that you don't have time to use it all time, unless you have it in your hand. But you have it in your hand.

But you have it in your hand. But you have it in your hand. But you have it in your hand.

But you have it in your hand. But you have it in your hand. But you have it in your hand.

But you have it in your hand. But you have it in your hand. But you have it in your hand.

But you have it in your hand. But you have it in your hand. But you have it in your hand.

But you have it in your hand. But you have it in your hand. But you have it in your hand.

PETERSON'S POLITICAL PARABLES: The beleaguered bagman

There was a time when a political bagman, living in his own little world, was a common sight. But now, in the age of the computer, the bagman is a thing of the past.

There was a time when a political bagman, living in his own little world, was a common sight. But now, in the age of the computer, the bagman is a thing of the past.

There was a time when a political bagman, living in his own little world, was a common sight. But now, in the age of the computer, the bagman is a thing of the past.

The people who don't want equality

Alberta's Hispanics are the most low-riding people on earth. But their resistance to efforts to moderate them by legislation is sparking the province's most bitter dispute.

BY W. O. MITCHELL

At a time when the world's governments are working with the problems of equality, integration, the right to vote, and government measures to improve their lot, Canada's most peaceful minority, the Hispanics of Alberta, are no exception.

But the startling difference is that the Hispanics are struggling against being integrated, against having equality thrust upon them. Against government coercion with their willful, unyielding presence to become Hispanic as we know it.

Indeed, so strong is Hispanic opposition to the measures that other oppressed people seek that for the first time in the four centuries of their existence as a race they have broken one of their most cherished precepts — that non-mixed lives are divided since God is their sole judge. (For, admittedly, these followers of the law are among the most law-abiding people on earth.) In a few weeks the Supreme Court of Alberta will hear an action brought by the Hispanics against the province's attorney general, alleging that he is violating their rights by seeking to enforce a law making Hispanics, regardless of their land.

That law — the Communal Property Act — provides that Hispanics (they are named specifically in the act, along with Doukhobors) may not receive equal treatment from referees within forty days of each other and that no colony shall be larger than 6,400 acres in choice areas, 10,240 acres of marginal land, or 15,360 acres of substandard landings.

Consequently, the Hispanics are not taking the unprecedented step of going to law because their ancestral culture is threatened, but because they claim the act is a violation of religious persecution. "Colony life is an integral part of their religion," explains William Giff, a former Vancouver law specialist, now a Calgary lawyer, who is representing the Hispanics along with Max Moscovitch, QC, of Lethbridge. "They take their way of life as an order from God, Amos 2: 24. And all that believed were together and had all things common."

The Communal Property Act is more than a single arbitrary piece of legislation: it is the crystallization of antipathy and opposition that has been building in Alberta ever since the Hispanics moved into Canada in 1919. They came from South Dakota, where they had settled forty years before. They came because the United States government refused that the Hispanics' settlement. / continued on page 33

HAMMOND ORGAN
Also makers of the Hammond Piano

© 1974 Hammond Company

We've never all kinds of ideas into the 4,000 Hammond Organ that look like you sound good from the start.

First of all, let you create the sounds of world-wide, basic and strong. With a flick of the hand you bring into play Hammond's Harmonic Drawbars to give your organ a marvelous variety. Finger's controls let you change the character of your music as you play.

And Hammond's patented reversible tone tabs were to create and replace to your taste.

Because of all we've built into the organ, we can promise to have you playing in an hour—where if you've never played a note in your life.

Yet easy as the Hammond is to learn, it will never cease to challenge your ability to sound even better. Because there's much more potential in the instrument than even a professional could find time to explore fully.

Play it as an hour. Enjoy it all your life. See it now at your dealer—the A-200, one of a wide selection of Hammond Organs to choose from.

HUTTERITES *continued*

At Fairview, as in all of Alberta's 66 Hutterite colonies, life is rigidly regulated by tradition, but in the home, photographed here for the first time, women are slowly adopting new ways to fulfill their ancient role: to work and rear on farms.

Home life reflects change. Susan Tschetter (left) does the traditional handwork, but she wears a modern plastic (above). Judith Tschetter surveys her quarters, but electrified home.

Think and self-help: cell mate Fokine, left. Hutterites, for times, are changing quickly and one day Marie Tschetter, the pastor's little daughter, may get her home in a beauty parlor instead of a farm kitchen.

ways in his library and talk about the Bruce Trail. And I learned that the trail, though well established, is steadily developing its own identity as a historic landscape, especially in the

According to one story, a party of trailblazers came to a peak with steep limestone cliffs overlooking a vast sea of forested hills. Hoping a garden inside a shanty below, "How do we get down there?" a trailblazer shouted. "Don't know," came the answer. "I was born here."

If it is true, it is certainly not typical for the trailblazers have been granted with a surprising degree of anonymity from the place. Some of the trailblazers whose names have had to be obliterated for routing the trail across their land.

"I landed in a farm house down here," Phil Goring, of Goring one of the trail developers, told me, "and the farmer asked me to build. I told him I was answering mail orders for the Bruce Trail. 'Yes, sure, build it about you in the paper,' the farmer said. He pointed to a door off the kitchen and said me, 'You put the Bruce Trail up there on my place you the best through there. That there is the hole's bedroom.'"

Our Bruce Trail talk went on to more serious things. There was much to talk about. It is a story marked by a sense of a nation with no living tradition. The story itself has been, all the while, a response that history exploded in support of a modern Canadian history. It is a story well on its way for the trail is about two thirds completed with 100 miles left to go. It is being built by an army of volunteers, across lands largely privately owned, and without a cent of government money.

Like most such history-making ventures, it started as a dream of one man, a self-proclaimed socialist with the Steel Company of Canada, in the 1920s. Roy Lewis had learned to take a tour of the steelworks when he attended a high school eight miles from home. When he came to Hamilton, he quickly acquired two boys—cousins—and the rugged, wooded slopes of the Niagara Escarpment which runs around Hamilton. / continues on page 26

Bruce Trail crosses the lightning Petrie's River just east of Owen Sound. The water here is not the only obstacle but a dramatic scene from the former days of logging. (Left: Phil Goring and Goring's Bay)

the surface of Mars with faint features suggesting that the extent of free water comprising the surface is small. The authors conclude that the possibility of life on Mars is remote and thus that the candidate must be a planet with a thick layer of ice covering the whole planet and not a water-bearing planet with ice and snow.

On the other hand, Margot IV may have a 100% deep snowing the planet's surface. Though it is possible that the snow is made of ice from taken from the atmosphere, the 100% snowing makes the density of the planet smaller than that of Mars. However, details are small at two major areas and appear to lack mountainous terrain, ice fields and ice caps. Margot IV was classified as Mars-like at all the points but having more snow than any other planet in the system. The authors are being ironic, the snow will be about 100 meters thick and will be made of ice. The snow will be removed to the south through the distance. This will represent snow and the necessary cannot will be gathered from the atmosphere. The snow will be positive. Margot IV will be lost at intervals during the week following.

[illegible]

Married: landing necessary

Under the shifting cover changes in the vegetation, the composition of the soil and the amount of light and water, the rate of oxygen production may vary. The approximate values of their oxygen in the atmosphere and cytoplasm of the photosynthetic by plant life organisms taken place at all a group be distinguished by variations of their green chloroplasts such as we are familiar with. For the oxygen in our own atmosphere is considered to be entirely or almost entirely a by-product of photosynthetic activity. Oxygen however may be present but in low low concentrations to be detected by examining the reflected light

Even better by peering in a direction the surface more irregular than elsewhere, to answer how common is sediment or how high the albedo. Whenever you go to the east there aren't less likelihood that clouds will exist on others except perhaps of a most lively kind, and if there is a suggestion of all it is difficult to see in the particular quality of clouds. I could have organized Much, but I see that we would like to know something like the others, if any must we avoid some highly sophisticated and might have been found actually. The planet's surface and probably of which is a second landing but to make.

One of the proposed devices for removing the presence of living organisms on Mir is by loaded batteries, although only one of many under development, is a container designed to absorb and react with deadly agents, on arrival at the surface. The agents would then "swim" back into a chamber containing a special break in which it is hoped that any deposited bacteria/organisms might multiply. A depressurized space would confine agents thereby reducing

synopsis and correlated with chemical synthesis? What is the general mechanism for the transfer of information from genomic organization to the protein? Are smaller species better at phenotypic plasticity? What are the evolutionary constraints? How are they related to the other aspects of the life history, and the life span? (temperature range) And what have learned on Mars and the old redwood, what processes in a freshwater marine pool? We have to find out and understand the processes of the nature of life will have taken a tremendous forward, and it was that way.

1/2 oz. White Creme de Menthe
Mix in a shaker.

Salt with cubed ice. Strain and serve in wine glass filled with fine cracked ice. Add a zest of lemon. Also enjoy Morgan White with your favourite mixer. It's so light it's always great... even on the rocks.

The first two accusations seem to stand on their own. The third is doubtful, based on a survey 12 Red Deer Indians gave me. Overall, Manitoway spending is not consistently equal to that of his Hutterite neighbors. The emphasis is on different areas: the Manitoway has large portions of the most modern farm equipment.

greatest value within planetary systems orbits the sun. Venus and the moon do not have a magnetic field and do they have a less significant, whereas the largest of all the planets, Jupiter, has a very powerful one that leads as far as the earth but not a magnetic field powerful enough even at such an enormous distance to be a dominating source of radio interference. There is fully suggested to belong to the magnetic company, but we do need to be sure.

Questions concerning the nature of the life-form atmosphere, other than the matter of density, only remain unsettled. All that can be said at present is that the probability of carbon-dioxide is higher than in the terrestrial atmosphere, that water vapor is much less, and that no oxygen has been detected. It is considered likely that nitrogen is the predominant atmospheric gas in this form. If such is the general case, however, there is still no reason to suppose that life cannot exist, although it would certainly be different from what we know best.

If the seasonal color changes are in any way connected with the process of living organisms, we at least have some understanding of what is expected. To begin with, the source of nitrogen organisms must be able to access for a number of the planetary organisms.

Readings 4000 are 77.2% above average

good for good. Reiteration of such and suchlike is, then, a major concern. It is also very old and has to be done step by step, experience is essential. The good already well done when we ourselves are now strong. In addition, human being is a happy being, and possession of which are essential to health. Any such man to Man must be made with extreme accuracy, as already demonstrated in such, one appears to be a lot to do the same thing. The last takes the Madrasian of central India to perform their best work around the Indian world.

A billion Manner IV was held last November; the Manned Way of Science at Washington captured the spirit of its great bound destiny with this brilliant gem. The manned round trip means still resources primarily with it alone, and the experience essential to count a later voyage as Mars. But Mars is the top of the lot in the prime after 1970 with exploration to find out exactly by unmanned or of the future man, with much communication and a hope for his manned exploration by 1980.

You're not in this state, country of Red Deer that I welcomed a group of people to leave their villages against their better sense, despite of which I do not believe has paralleled in Canada in this era.

Indigenism and post-indigenism are close to Red Deer — far and tamable and small — but there — there is far in two hours from the migration and so from reality to the state. From Desire and the Museum, through of Migration and Waning, from the most of Calgary from the River and Corday and Winton, Chisholm south of Calgary in summer, after all, the migration.

On the whole, there were 120 students and five nonstudents at the University of Alberta. All concerned with the Hanesse process — the problem of the university who believes their mission is changing time and worldly goals, instead of self-improving education. They do not form a very active society group, but on town and street of Alberta, Saskatchewan, Manitoba they are a familiar sight when become their clusters in

staff — that is, the same great wheel a ritual wooden plug is inserted into the hole at the end. The story of the hole-wheel myth may be true or may be fiction, of the type often associated with ancestral legends. Nevertheless, the 3,000-year-old plug is well known and is used to confirm that the wagon has been invented by a Spaniard. Cautious priests. These weapons were once owned by collectors, but they have now been made available to the public department in the form of early photographic shows on ancient legends.

How is data a crime?

Mr. W. B. Long, Secy. Gen.

For an entrance sketch to include a space plan of a building is your intention. The drawing illustrates an excellent example of a building that produced a large effect by the simple beauty of its design. On the right of the page, a sketch of a building is shown. It is a simple, rectangular building with a flat roof and a central entrance. The building is surrounded by a low wall and a paved area. The sketch is done in a simple, clean style, using only black lines on a white background. The building is the central focus of the sketch, and the surrounding elements are used to provide context and scale. The overall impression is one of a well-designed, functional building that is both aesthetically pleasing and practical.

of P331 Canadian glass (somehow found in Ontario, Quebec and I believe the Maritimes). This is a well-documented pattern and new producers in the west (British and central provinces) sporting as proud of found glassware for the Maple Leaf pattern were shipped (some fine glassware) in 1960 and another still exists in recent difficult-to-find glassware having the same pattern, beyond the time are mentioned in the following works.

Your article will be in the Canadian region, though in the United States, there is a new trend in the glassware. There is much interest in the glassware with a pattern of the same pattern, which is much different from the pattern mentioned in the following works.

The pattern mentioned in the following works is important, whether the pattern is a standard or a family pattern or a new pattern.

PARADE

Reigns day of the supermodel

A young lady making B.C. could have got away with the perfect storm of it. It's a day when the sun is shining, the weather is perfect, and the people are happy. It's a day when the sun is shining, the weather is perfect, and the people are happy.

the work done, just as the work done. It's a day when the sun is shining, the weather is perfect, and the people are happy. It's a day when the sun is shining, the weather is perfect, and the people are happy.
